**To whomever this may concern,**

This letter is an attempt to convey my appreciation for the Project Shiksha team's outstanding efforts in the areas of financial literacy promotion and community service in India's developing cities. Through the effective simplification and explanation of the value and application of financial literacy, **Project Shiksha** has effectively addressed a problem that many students and young people in India and other states encountered.

Orchestrated by the founder Agastya Chordia, along side other team members demonstrated unwavering dedication in supporting and strengthening the knowledge of the young students in a growing age.

Throughout our discussion and observing thier passion and devotion to this noble endeavour. Having complete confidence in thier ability to expand thier initiative Project Shiksha for even more significant influence. I extend my best wishes to them and eagerly anticipate the national recognition of their journey. Their enthusiasm for empowering both students and schools aligns perfectly with the current needs of our nation.

**Regards,**

**Head Mistress**
